Vault has been developed by
AutoRABIT for the Salesforce

Environment. AutoRABIT, the leader in Salesforce Continuous Integration and Continuous Deployment (CI/CD), completes hundreds of rollbacks each month as part of DevOps. This guarantees a true and tried Backup and Recovery solution that works 100% of the time.

Robust and Dependable Backup Build for Salesforce

Push changes from the Dev Sandbox all the way to Production fast and without errors. Deploy without needing changesets, check deployment results before actually deploying, keep environments in sync without finding dependencies or Sandbox refreshes. AutoRABIT makes you a DevOps pro without having to code.

Backup and Recover What's Most Important to Salesforce

Vault delivers the ability to backup and instantly recover file attachments, metadata, chatter feeds, knowledge articles and all the rich content to reinstate the complete Salesforce experience. Maintains hierarchical data integrity.

Meet Compliance Needs

Meet IT policy and regulatory requirements. Backup in 5-minute intervals. Fastest RTO (Recovery Time Objective) in the industry.

BACKUP | COMPARE | RESTORE | REPLICATE | COMPLY | SECURE

Vault Backup and Recovery for Salesforce

General purpose data recovery solutions will not restore metadata. Recovered files must be manually combined in a long and tedious process that still does not restore the full Salesforce experience. Vault will help you stay compliant while you protect yourself and your Salesforce data.

VAULT BACKUP AND RECOVERY FEATURES INCLUDE:

BACKUP: Fully automated cloud backup

- > Standard and Custom Salesforce Objects preserved.
- > Relationships maintained in backup.
- > Files, attachments, chatter feeds, knowledge articles and custom data sets included.
- > Daily unlimited backups with the ability to backup just what's changed.

COMPARE: Compare instance snapshots, data and meta data in the same view

- > Significantly reduce recovery time.
- > Visual interface to track and identify changes to data and meta data over time.
- > Compare backup snapshots with live Salesforce data.
- > Control granularity to entire org or individual objects etc.

RESTORE: Recover everything

- > Recover data, metadata, attachments and more.
- > Easily rollback the entire org.
- > Parent, Child, Junction and other relationships
- > Field level, object level, record level data can be requested from multiple points within the snapshots.

REPLICATE: Simply replicate data and metadata

- > Easily select data sets for testing scripts, code, rules and reports.
- > Customize the test data for your sandbox.
- > Automatically detects data object relationships.
- > Supports data masking of production data during test.

COMPLY: Vault allows organizations to meet compliance and IT governance requirements

- > Meet ISO 27001 and NIST backup and recovery standards for IT.
- > Support industry specific regulations for Healthcare, Financial Services, Government, Utilities, and many others.
- > Supports Right for PII to be forgotten. Meets GDPR.

SECURE: AutoRABIT puts special emphasis on information security and privacy standards

- > Support for customer-owned encryption keys.
- > Field encryption support.
- > SSO and Multi-Factor Authentication support.
- > Integration with Salesforce Shield for Security.
